We are becoming stronger, more reliable
and closer to our clients

Twice the space. More room to deliver.

Our Pistoia headquarters has expanded

600 sqm → 1,200 sqm

A larger, more efficient workplace designed to support growing demand.

More laboratory space

Dedicated areas strengthen workflow, capacity and operational control.

Lean improvement

Processes, organization and sample turnaround time are being continuously improved.

Sample Traceability

Operational dashboards provide a clearer view of samples, workload and priorities.

New technologies. Stronger evidence.

An expanded analytical platform for emerging and complex testing needs.

Bomb calorimetry

Sample decomposition to convert fluorinated substances into measurable fluoride.

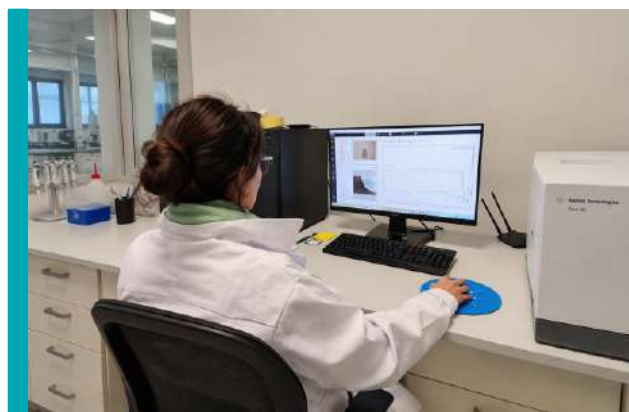

Ion chromatography & ISE

Complementary confirmation tools to detect and quantify total fluorine.

Total Organic Fluorine

TOF determination via Pyrolysis–Gas Chromatography–Mass Spectrometry (Py-GC/MS).

Microplastics testing

A dedicated testing capability currently progressing through accreditation.

A broader toolkit for reliable screening, confirmation and quantification.

More control. More expertise.

Technology and people are growing together to improve the client experience.

Company&Products data control

On Line Sample Acceptance

Sales Process traceability

Integrated tools support clearer information flow, order tracking and decision-making.

NEW PEOPLE FOR A STRONGER COMPANY

Andrea Guasti

Controller

Monitors company costs, revenues and financial performance, supporting budgeting and management control activities

Luca Svolacchia Brusoni

Business Development

Identifies new business opportunities, develops customer relationships and supports market expansion strategies

Tommaso Nesi

Internal IT

Manages the company's IT infrastructure, systems, software and technical support for employees

Andrea Bonechi

RGQ

Oversees the Quality Management System, ensuring compliance with applicable standards, procedures and quality requirements

Alessia Spinelli

Internal Sales

Manages customer requests, quotations, orders and commercial activities, supporting the sales process

Giulia Zampini

Laboratory Technician

Performs laboratory analyses and tests, manages samples and ensures accurate recording of analytical results

Stronger capabilities, closer collaboration, greater value for every client.
